

SR-162 & SR-262

San Juan County

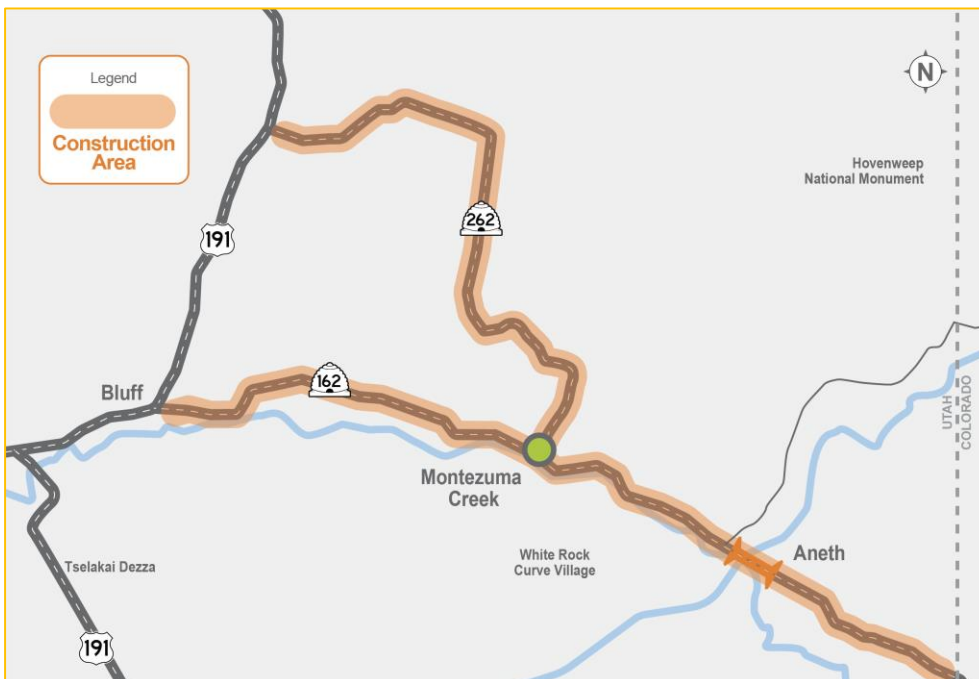

Project Introduction

The Utah Department of Transportation (UDOT) in partnership with the Navajo Nation has received a Nationally Significant Federal Lands and Tribal Projects Grant. The Grant will be used to improve safety on SR-162 and SR-262 in San Juan County, Utah. Additional federal and state funding has been approved with work tentatively scheduled to begin in August 2024.

Project Purpose and Improvements

The project objectives are intended to improve safety and pavement along 53 miles of road in San Juan county between SR-162 and SR-262. Additional improvements include the rebuild of multiple structures, and other roadway specific enhancements. The following is a shortlist of several key upgrades:

- Improve and/or reconstruct pavement
- Improve an/or install safety features such as guardrail, cattleguards, extra signage, protected turn lanes, and pavement markings
- Widen lanes and/or add shoulders
- Rebuild or improve several dozen culverts and flood mitigation infrastructure
- Construct a roundabout at the SR-162 and SR-262 intersection
- Replace the SR-162 bridge over McElmo Creek
- Install fiber-optic conduit
- Install over 50 cattleguards at various roadway access points
- Construct a livestock crossing under SR-162

by UDOT

Road Construction Notice:

The Utah Department of Transportation (UDOT), in partnership with the Navajo Nation, will begin work on SR-162 and SR-262 to improve and preserve roadway conditions. The project objectives are intended to improve safety and pavement along 53 miles of road surface. Additional work includes the rebuilding of multiple structures, and other highway specific enhancements. For a full description of key upgrades, including structure renderings, please visit the project website.

Construction Schedule*

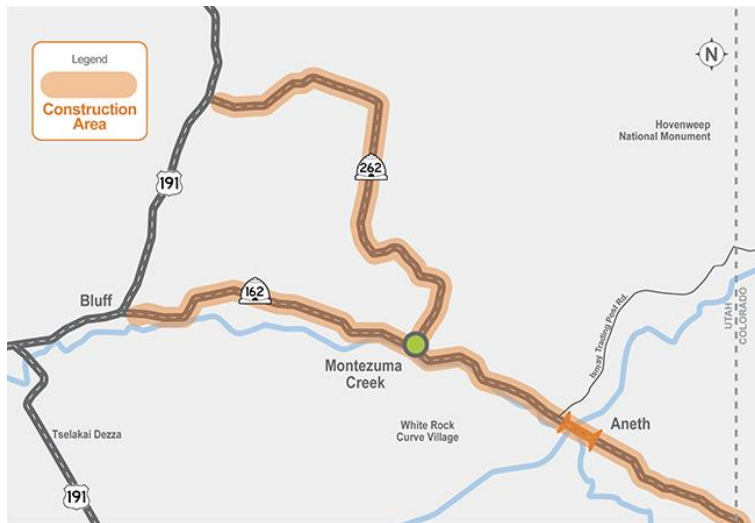

Project Start: As early as August 13, 2024

Workdays: Monday – Friday (Except Holidays)

Hours: 7am – 7pm

Estimated Completion: Late 2025 / 2026

**Schedules are subject to change due to weather and materials available*

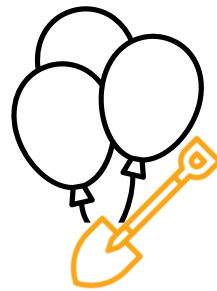

Groundbreaking Ceremony!

When: August 13, 2024

Time: 11:30am

Where: Montezuma Creek

Construction Impacts

All work will begin off-roadway for the first xx months. By Spring 2025, expect lane closures with one-way alternating traffic regulated by temporary traffic signals and/or a pilot car. Speeds will be reduced to 55mph approaching work zones. Motorists should expect light delays ranging from 5 - 15 minutes. Intersection access within the project route may be restricted intermittently for construction. Be cautious and slow down near construction barrels and cones. All lanes will remain open during daytime hours, weekends and holidays.

Key Project Benefits

- Improve and/or reconstruct pavement
- Improve safety features such as guardrail, signage, and pavement markings
- Widen lanes and/or add shoulders
- Rebuild or improve several dozen culverts and flood prevention infrastructure
- Construct a roundabout at the SR-162 and SR-262 intersection
- Replace the SR-162 bridge over McElmo Creek
- Install fiber-optic conduit
- Install over 50 cattleguards at various roadway access points
- Construct a livestock crossing under SR-162
